

Summit Series II

Thank you for ordering a Lester Electrical battery charger.

As a valued customer, we are pleased to share with you that our line of chargers received an upgrade! The iconic silver-colored 'cube' charger you are familiar with (and may even have expected) recently celebrated 55 years on the job. After such an accomplishment, it seemed time for retirement. After a big party, complete with cookie cake and all the 'remember when' stories we could handle, we removed the cube style charger from our manufacturing line. Inside the cardboard box before you is a charger so cool, it can hang with The Fonz.

It is lighter! Save the weight lifting for showing off at the gym. The Summit Series II weighs less than all the older models so it's easy to carry and quick to install.

It is smaller! We never agreed with bigger is better because we know the best things come in small packages. The Summit Series II is smaller while still fitting the same mounting pattern as your previous model with supplied adaptor plate(s).

It has better features! It might be small in size but it's giant when it comes to features. This arrived on your doorstep with its own app, Bluetooth® communication, Cloud connectivity and better charging efficiency.

It is durable! Go ahead and drag it, drop it – we dare you. It will take the best you can offer and leave you scratching your head about just how we could build something so tough. Just in case you are a long lost cousin of Houdini or the world's strongest person and it stops working, we've got you covered with an astounding 48-month limited manufacturer's warranty.

Like everything else we produced over the past 50+ years, the Summit Series II provides our loyal customers with the quality, and reliability expected from a Lester Electrical product. Go ahead, dance in your driveway and show it off to your neighbors. Just be kind you trendsetter you, tell them where you got it so they can get theirs ordered too.
